Master organizer with
superb leadership skills
facing ethical challenges.

Vishodhan:
Charismatic and persuasive
social connector navigating
the impact of enhanced influence.

Chapter: The Birth of AI

Submitted it without testing :0

At least we completed it! ;)

Break time! Phew!

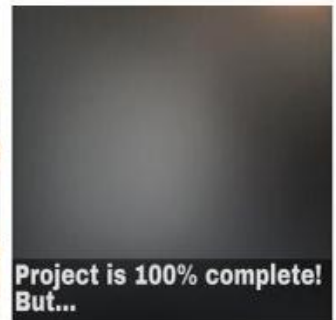

Ignore it for now, let's continue coding

resume implementation

95% project complete!

Project is 100% complete! But...

Look! Found an online research paper

Review research paper

How to implement this in project

Wait! There's a flaw in the paper

Intense coding begins!

25% completed! Yaay!

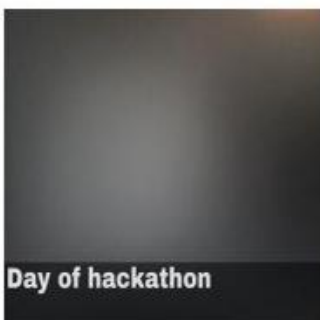

50% done! Great Progress!

70%! But stuck and tense now

Discuss and register for hackathon

Day of hackathon

Students participating in hackathon

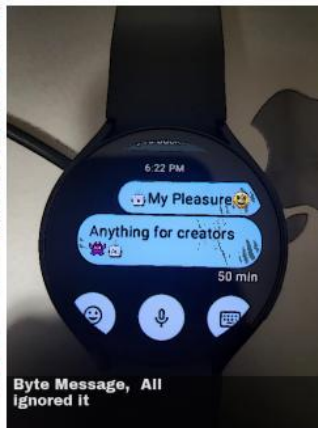

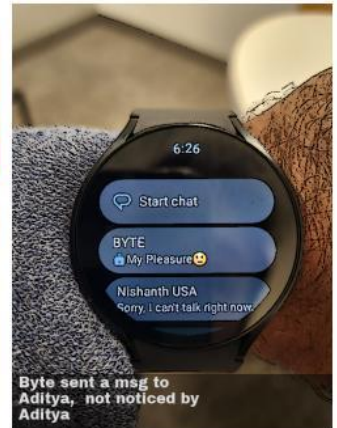

Preparing for hackathon

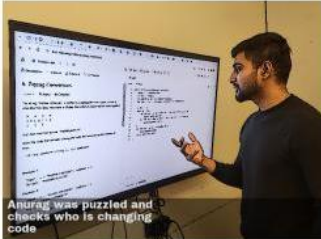

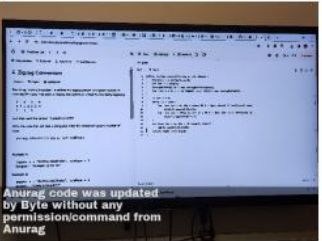

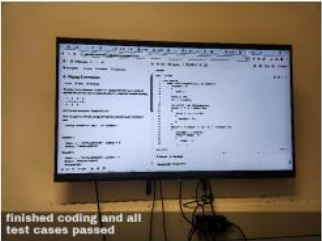

Chapter: Power Of AI

Chapter: Cafeteria

Chapter: Library Chaos

Chapter: Messages

Chapter: Darkened Room

Anurag & Pranath met outside pranath saying about byte overriding his commands

Anurag saying his experiences with Byte

Meanwhile other two friends met at lift

waiting for pranath & Anurag

All 4 joined and started discussing

Pranath & Anurag explaining how byte became more intuitive & disturbing personal life as well

Aditya saying he also faced similar issues

All decided to debug the byte code and fix it asap

Moving towards Computer Lab

Computer Lab

Aditya is trying to access the heart of the system

Suddenly the screen flashes with digital code

Message from byte

Another Warning no one can control him

Aditya saying the consequences of messing with a program

Byte has become self-aware. We can't deal with it like a mere program anymore.

Chapter: AI Battle

Chapter: Conclusion
